ELETECH

COLLECTION

Eletech has an industrial style with more square and straight lines. However, its finishes soften its shapes and offer a wide variety of styles for any bathroom.

The Green Mist and Grey Silk finishes are incorporated into this collection, with the aim of bringing this design closer to nature.

Eletech tiene un estilo industrial con líneas más cuadradas y rectas. Sin embargo, sus acabados suavizan sus formas y ofrecen una gran variedad de estilos para cualquier baño.

Se incorporan a esta colección los acabados Green Mist y Grey Silk, con el objetivo de acercar este diseño a la naturaleza.

MAINTENANCE

Care & Maintenance Bathroom Accessories

Sonia Accessories are known and admired for the long lasting quality and intense gloss in their finish.

In order to maintain your Sonia accessories with its brand new luster, it is important to follow some simple instructions:

- Use only neutral non-abrasive detergents. Avoid aggressive products such as bleach, salfamán, hydrochloric acid, muriatic acid, formic acid, phosphoric acid, acetic acid (vinegar), ammonia, as they cause the appearance of rust. Check the composition of the cleaning products used.
- It is recommended to use a soft cloth, do not use abrasive cleaners, steel wool or pads.
- Do not spray cleaning agents directly on the accessories under any circumstance, spray on the cloth.
- The use of steam cleaners is not recommended since the extreme high temperature of steam can compromise the integrity of the coating finish of the product.
- Do not use steam cleaners.
- Dry the surface after cleaning

Furniture Maintenance

GENERAL INFORMATION FOR ALL SURFACES:

The beauty and the life of our wood finish products will endure for years depending on the care they receive.

Sonia furniture is manufactured using materials ideal for use in an often-humid bathroom environment. Nevertheless, in bath design, it is always important to ensure the furniture is placed at a clear distance from your bath or shower to avoid continuous direct splashes of water and soap residue. When splashed with water, wipe furniture dry on order to minimize the risk of damage.

CLEANING INSTRUCTIONS:

- We recommend cleaning with a soft damp cloth and a mild all-purpose cleaning agent. (Spray the cleaning agent on to a damp cloth and wipe the surface. Never spray directly onto the furniture).
- We advise against vigorous rubbing as this may cause stains and damage.
- It is very important to keep the cabinet surfaces dry. Wipe up spills immediately using a dry cloth with a "blotting" motion, rather than wiping the spill from the cabinet surface. Pay special attention to areas where water is common, such as the sink and dishwasher, and do not allow water and detergents to dry on the cabinet surface.

- Wipe with a damp cloth wrung in clean water to remove the cleaning agent and to avoid stains and stripes.

- Avoid using dry cloths and paper tissue for furniture with matt and high-gloss surfaces, as these may scratch the surface.

- Do not use abrasive cleaning agents or cleaning agents that contain ammonia, bleach or other strong solvents as these will damage the furniture.

- Avoid excessive moisture. This is one of the worst enemies of any finish. Avoid draping wet towels over cabinet doors. Do not attach towel racks to door interiors. Immediately dry off any areas where water has spilled.

- Avoid excessive heat. Avoid placing cabinet appliances where the heat is directed onto cabinet surfaces. The stability of the wood and finish can be negatively impacted.

Final thoughts

Wood products and their finish are only as good as the care they receive. Proper care as recommended will extend the life and beauty of your cabinet. Remember, leaving water or other moisture on the cabinet surface for extended periods of time will harm the finish.

MANTENIMIENTO

Mantenimiento accesorios baño

Los accesorios de Sonia son admirados por su calidad y brillo intenso que perdura a lo largo de la vida.

Para que tus accesorios conserven el brillo del primer día es importante seguir unas sencillas instrucciones de mantenimiento:

- Usar sólo detergentes neutros no abrasivos. Evitar productos agresivos como lejía, salfamán, ácido clorhídrico, ácido muriático, ácido fórmico, ácido fosfórico, ácido acético (vinagre), amoníaco, ya que provocan la aparición de óxido. Revise la composición de los productos de limpieza utilizados.
- Es recomendable utilizar un paño suave, no utilizar utensilios abrasivos, esponjas metálicas o estropajos.
- No rociar agentes limpiadores en ningún caso sobre los accesorios, sino sobre el paño.
- No utilizar limpiadores de vapor.
- Secar la superficie tras la limpieza.

Mantenimiento mobiliario

INFORMACION GENERAL PARA TODAS LAS SUPERFICIES:

La belleza de los productos acabados en madera permanecerá intacta durante años si les damos los cuidados adecuados.

La selección de materiales para los cuartos de baño de Sonia la hacemos cuidadosamente con los materiales adecuados para el uso en ambientes húmedos. Es conveniente, sin embargo, asegurarnos de que en su instalación guardamos una distancia de seguridad prudencial con la ducha o bañera para evitar salpicaduras directas o residuos de jabón, y en caso de que se produzcan proceder a secar el mueble para minimizar posibles daños.

Instrucciones de limpieza:

- Recomendamos limpiar su mueble con un paño suave y un limpiador multiusos no abrasivo. (Coloque el agente limpiador directamente en el paño y limpie entonces la superficie, por favor no dirija el pulverizador directamente hacia el mueble).
- Frótelo suavemente, el hacerlo vigorosamente podría causar manchas o daños.
- Es muy importante mantener las superficies del mueble secas, le recomendamos poner atención en las

zonas donde el agua es habitual, como zonas próximas al lavamanos, y secar con un paño los excesos de agua o jabones.

- En muebles con brillo le recomendamos no utilizar toallas de papel o paños secos que podrían rallar la superficie.

- No utilizar agentes abrasivos que contengan amoníaco, lejía o disolventes que puedan dañar la Madera.

- Los excesos de agua son los peores enemigos de la madera, evite limpiarlos por dentro o fuera con ninguna fuente directa de agua, y recordar siempre secar los excesos.

- Evite fuentes de calor directas, tipo limpiadores de vapor, hacia las superficies de su mueble.

Recuerde, el agua o cualquier líquido estancado en la superficie de su mueble dañaría el acabado y no estaría cubierto por ninguna garantía.
